

# Neutron Distribution from remoll Simulation

- Energy Selection :  $> 10$  MeV
- Skyshine detector (#5556) and Hall A roof (#101)
- Distributions:
  - Energy
  - 1D vertex Z (along beam line )
  - 2D vertex X-Z and Y-Z
  - 2D X-Z hits

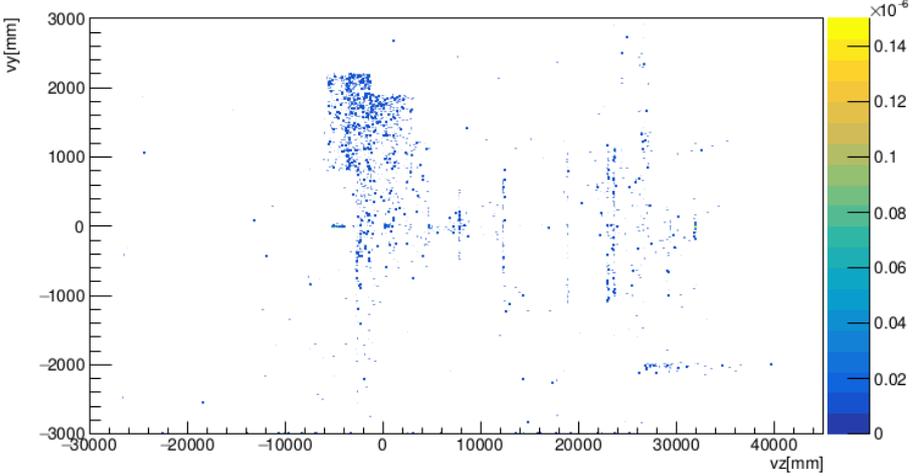

# Roof(101): HE(>10 MeV) neutron vertices

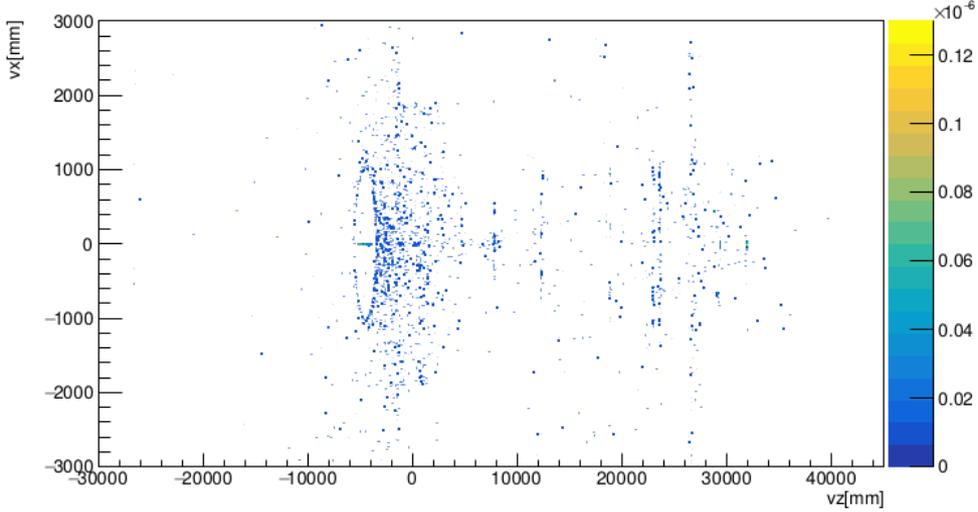

hits for allPZ neutron
