

Comparison of rates for different Lucite designs with the Lead donut frame turning to Galactic

The MOLLER Project
Measurement Of a Lepton Lepton Electroweak Reaction

Elham Gorgannejad

Dr. Wouter Deconinck

June, 2021

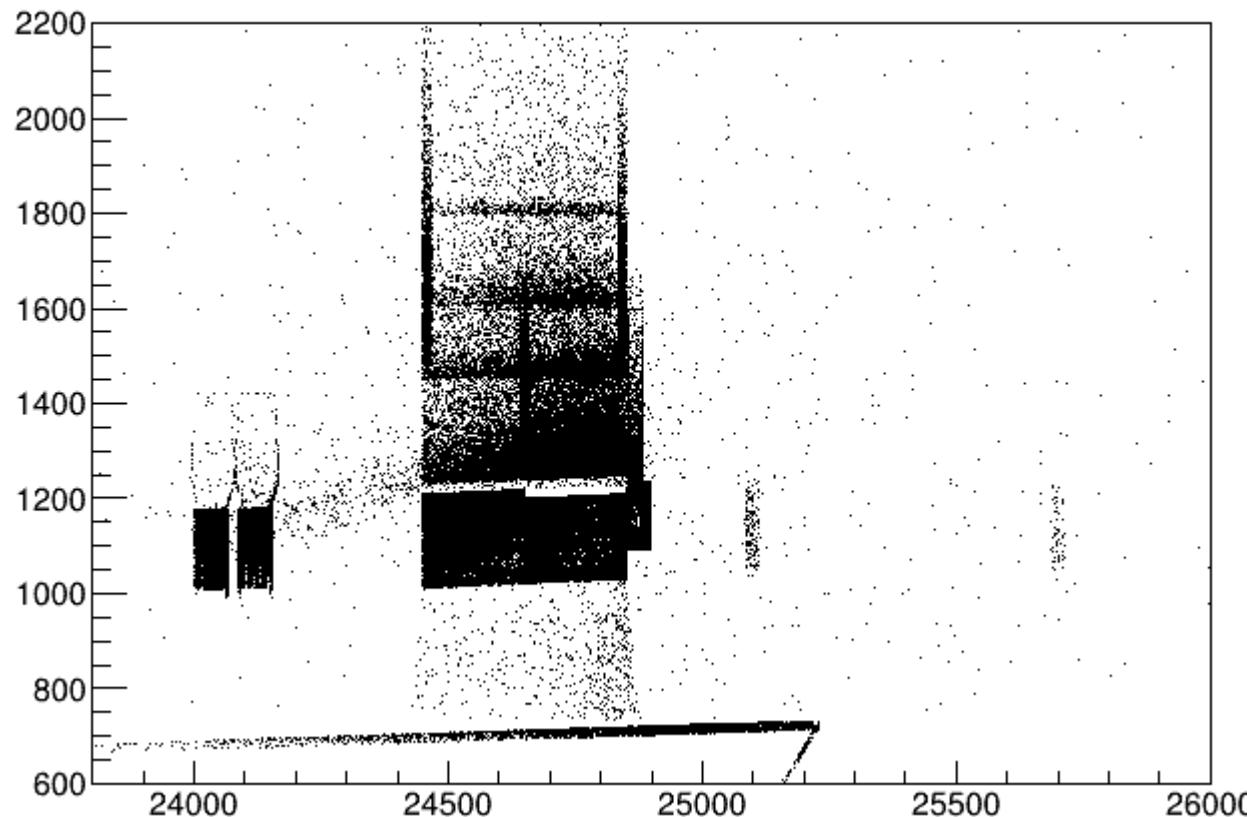

**University
of Manitoba**

The origin location of all the secondaries anywhere for 5M events- Galactic outer sleeve and top/bot sleeve support

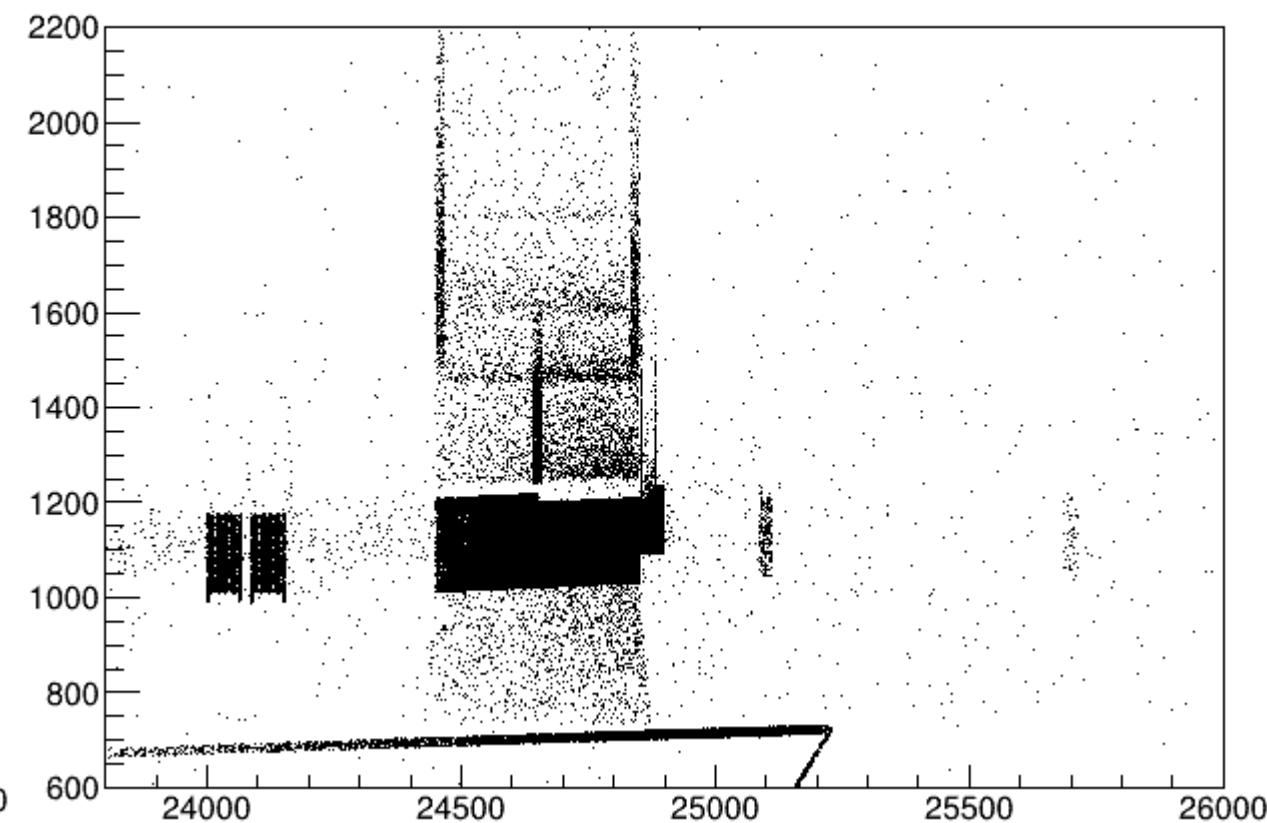

Moller

```
sqrt(hit.vx**2+hit.vy**2):hit.vz {rate*(hit.det==8001 && hit.trid>2)}
```

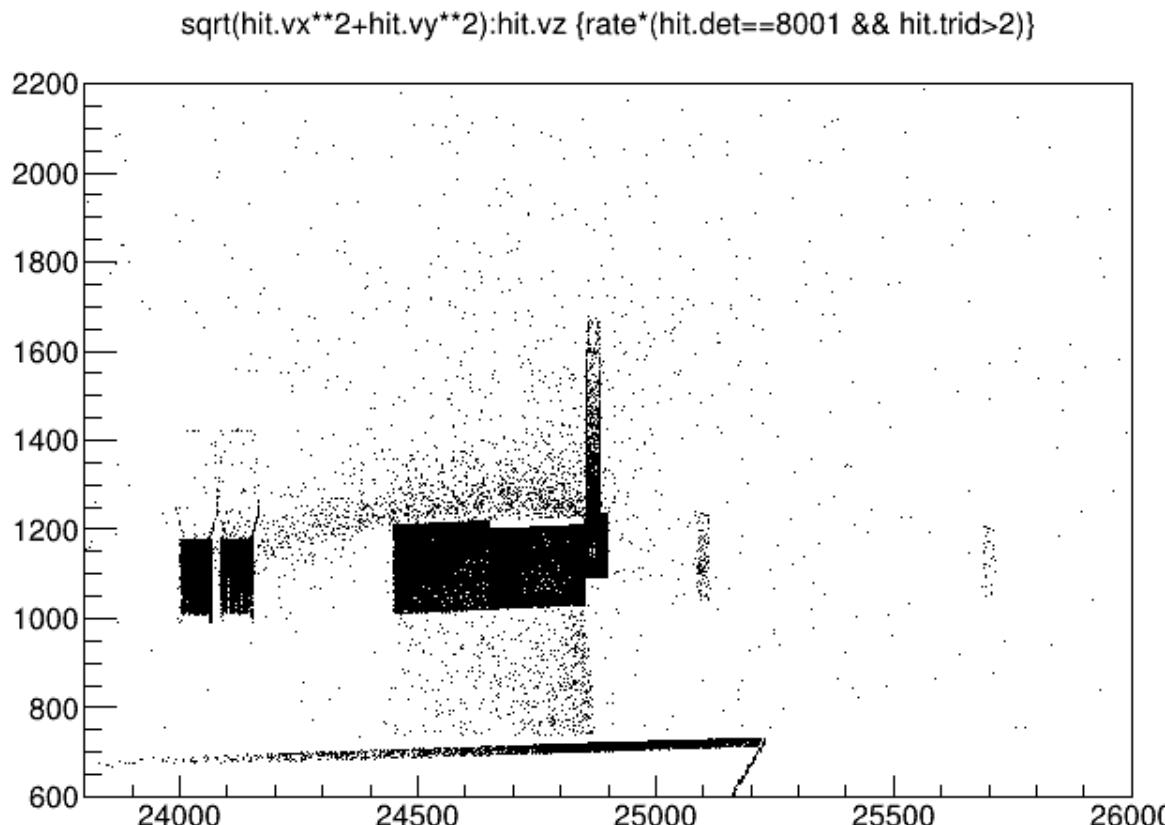

Pion

```
sqrt(hit.vx**2+hit.vy**2):hit.vz {rate*(hit.det==8001 && hit.trid>2)}
```

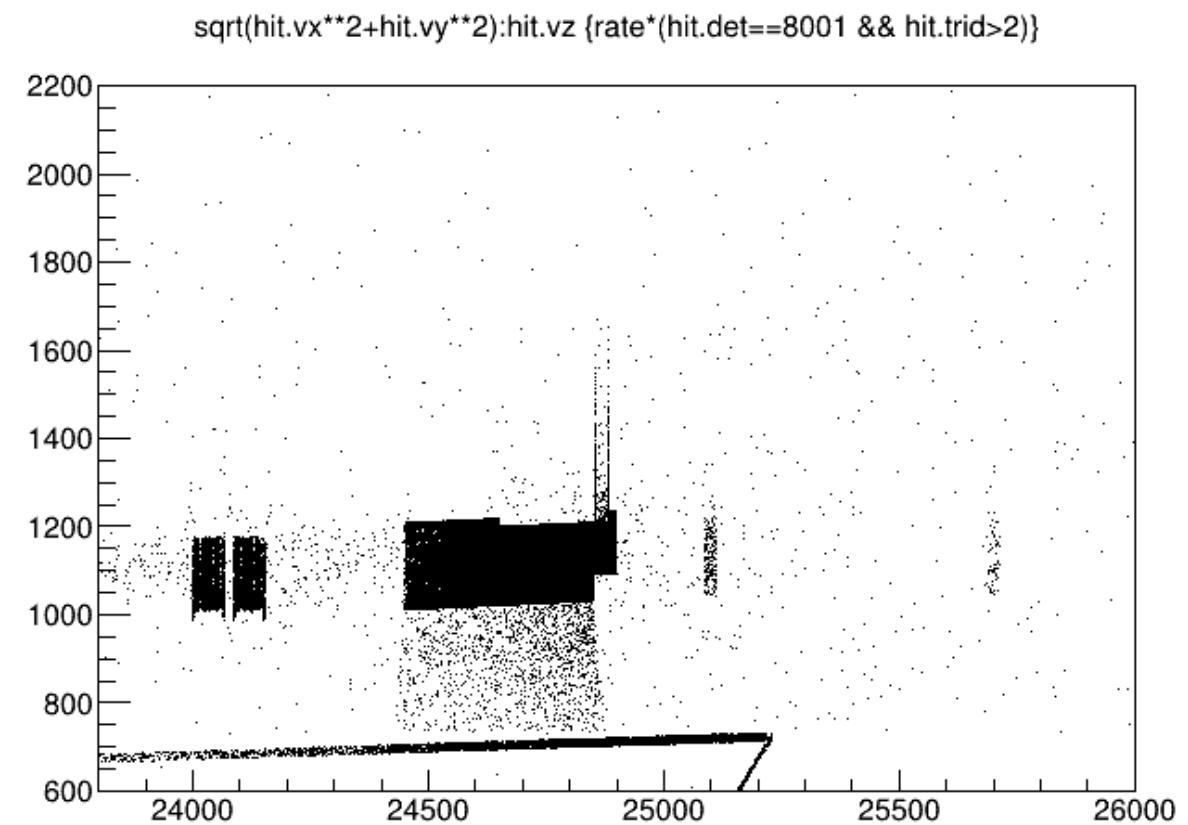

The origin location of all the secondaries anywhere for 5M events- Galactic frame

Moller

Pion

T->Draw("sqrt(hit.vx**2+hit.vy**2):hit.vz>>h1(100,23800,26000,100,600,2200)","rate*(hit.det==8001 && hit.trid>2)")³

Comparison of rates for Galactic outer sleeve (Low energy particles)

Rates GHz/ μA <i>/Detector</i>	Rate of electrons	Rate of pions	Pi/e	Rate of photoelectrons from electrons	Rate of photoelectrons from pions	Pi/e
Aluminium	$(2.47 \pm 0.01) \times 10^{-3}$	$(5.49 \pm 0.08) \times 10^{-6}$	0.22%	$(4.834 \pm 0.006) \times 10^{-2}$	$(5.039 \pm 0.008) \times 10^{-4}$	1.04%
Galactic	$(2.54 \pm 0.01) \times 10^{-3}$	$(5.58 \pm 0.08) \times 10^{-6}$	0.22%	$(4.215 \pm 0.006) \times 10^{-2}$	$(4.945 \pm 0.007) \times 10^{-4}$	1.17%

Comparison of rates for Galactic outer sleeve and Galactic top/bot sleeve support

Galactic	$(1.71 \pm 0.01) \times 10^{-3}$	$(5.41 \pm 0.08) \times 10^{-6}$	0.32%	$(2.216 \pm 0.004) \times 10^{-2}$	$(4.957 \pm 0.008) \times 10^{-4}$	2.24%
----------	----------------------------------	----------------------------------	-------	------------------------------------	------------------------------------	-------

Comparison of rates for Galactic frame

All frame-Galactic	$(1.260 \pm 0.009) \times 10^{-3}$	$(5.29 \pm 0.08) \times 10^{-6}$	0.42%	$(1.822 \pm 0.004) \times 10^{-2}$	$(4.850 \pm 0.007) \times 10^{-4}$	2.66%
--------------------	------------------------------------	----------------------------------	-------	------------------------------------	------------------------------------	-------

Comparison of rates for Galactic outer sleeve (High energy particles)

Rates GHz/ μA /Detector	Rate of electrons	Rate of pions	Pi/e	Rate of photoelectrons from electrons	Rate of photoelectrons from pions	Pi/e
Aluminium	$(3.05 \pm 0.02) \times 10^{-3}$	$(2.78 \pm 0.02) \times 10^{-5}$	0.91%	$(4.834 \pm 0.006) \times 10^{-2}$	$(5.039 \pm 0.008) \times 10^{-4}$	1.04%
Galactic	$(2.99 \pm 0.01) \times 10^{-3}$	$(2.73 \pm 0.02) \times 10^{-5}$	0.91%	$(4.215 \pm 0.006) \times 10^{-2}$	$(4.945 \pm 0.007) \times 10^{-4}$	1.17%

Comparison of rates for Galactic outer sleeve and Galactic top/bot sleeve support

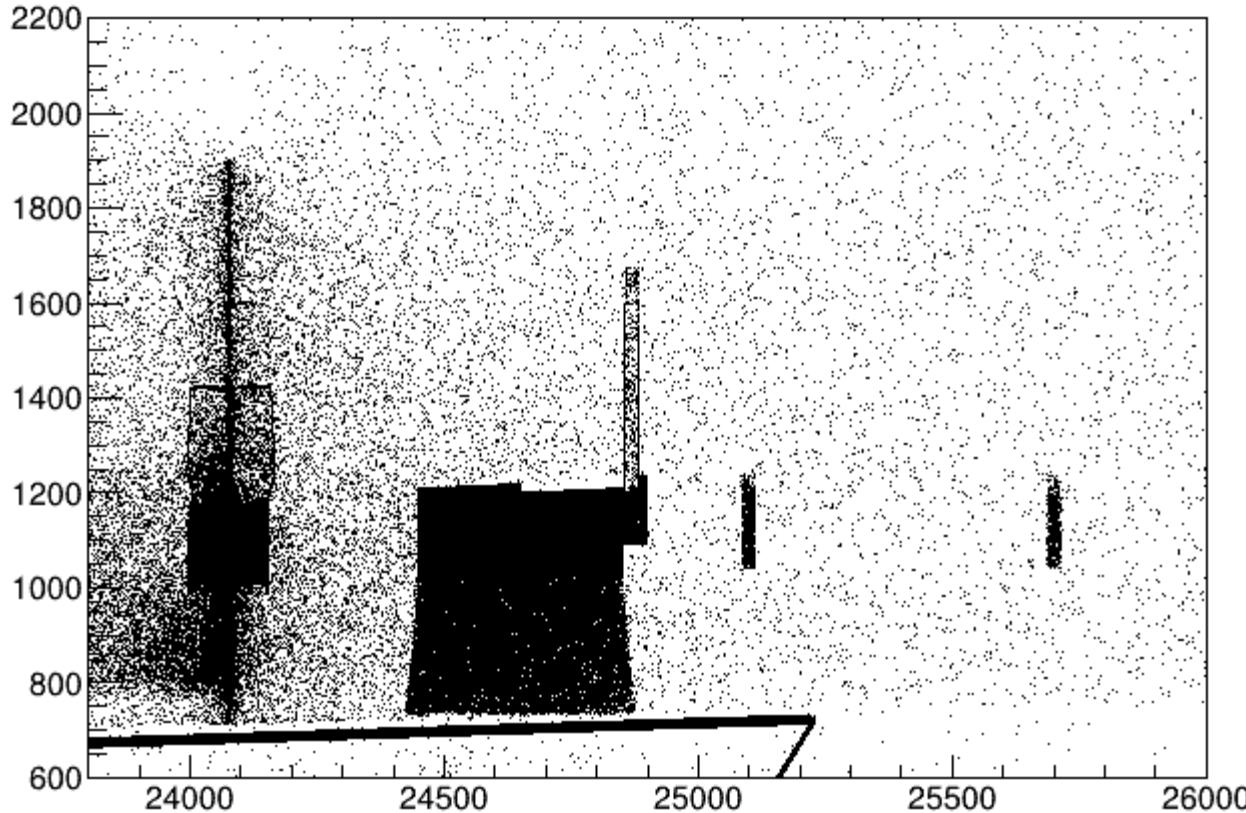

Galactic	$(1.56 \pm 0.01) \times 10^{-3}$	$(2.75 \pm 0.02) \times 10^{-5}$	1.76%	$(2.216 \pm 0.004) \times 10^{-2}$	$(4.957 \pm 0.008) \times 10^{-4}$	2.24%
----------	----------------------------------	----------------------------------	-------	------------------------------------	------------------------------------	-------

Comparison of rates for Galactic frame

All frame- Galactic	$(1.163 \pm 0.009) \times 10^{-3}$	$(2.74 \pm 0.02) \times 10^{-5}$	2.36%	$(1.822 \pm 0.004) \times 10^{-2}$	$(4.850 \pm 0.007) \times 10^{-4}$	2.66%
------------------------	------------------------------------	----------------------------------	-------	------------------------------------	------------------------------------	-------

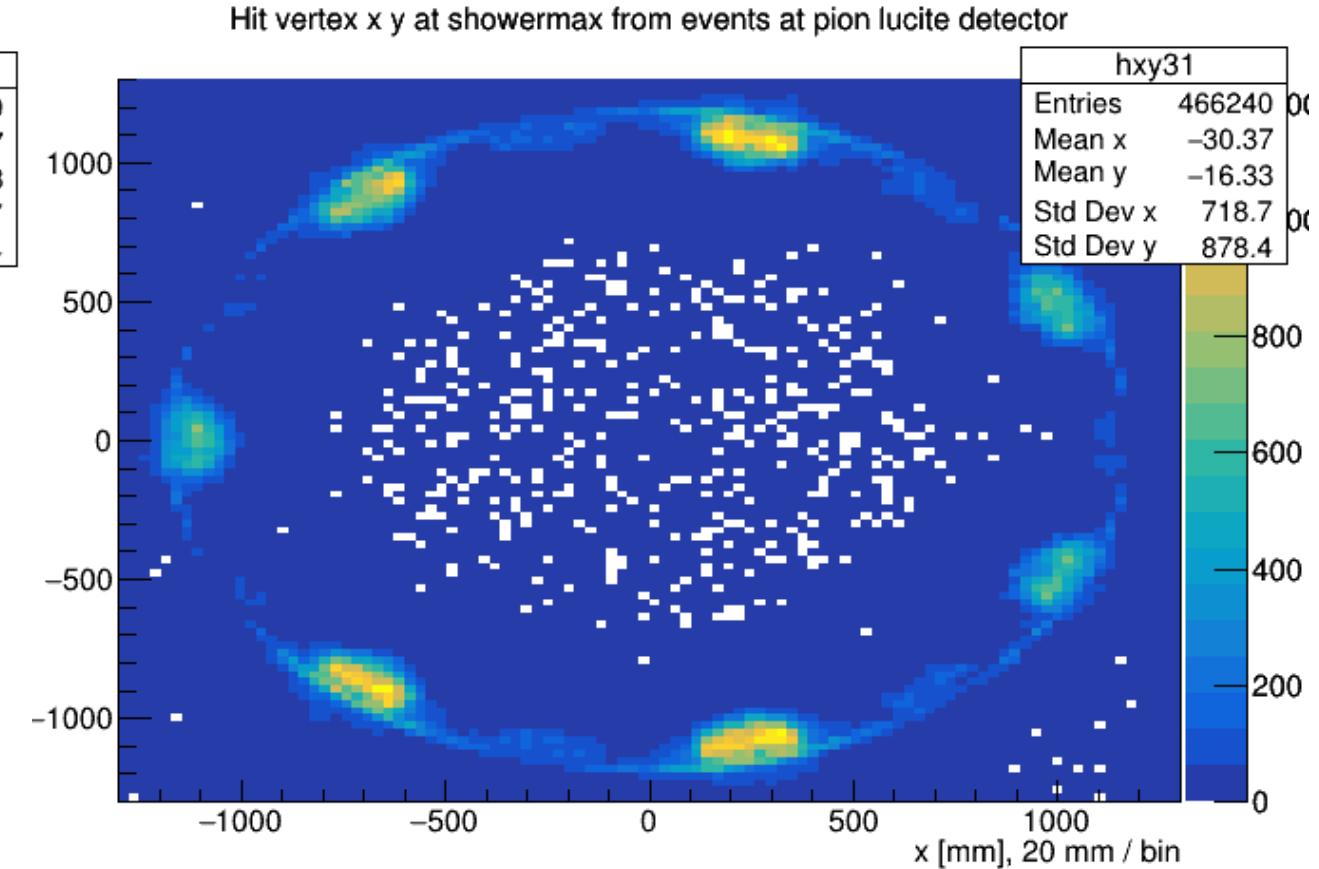

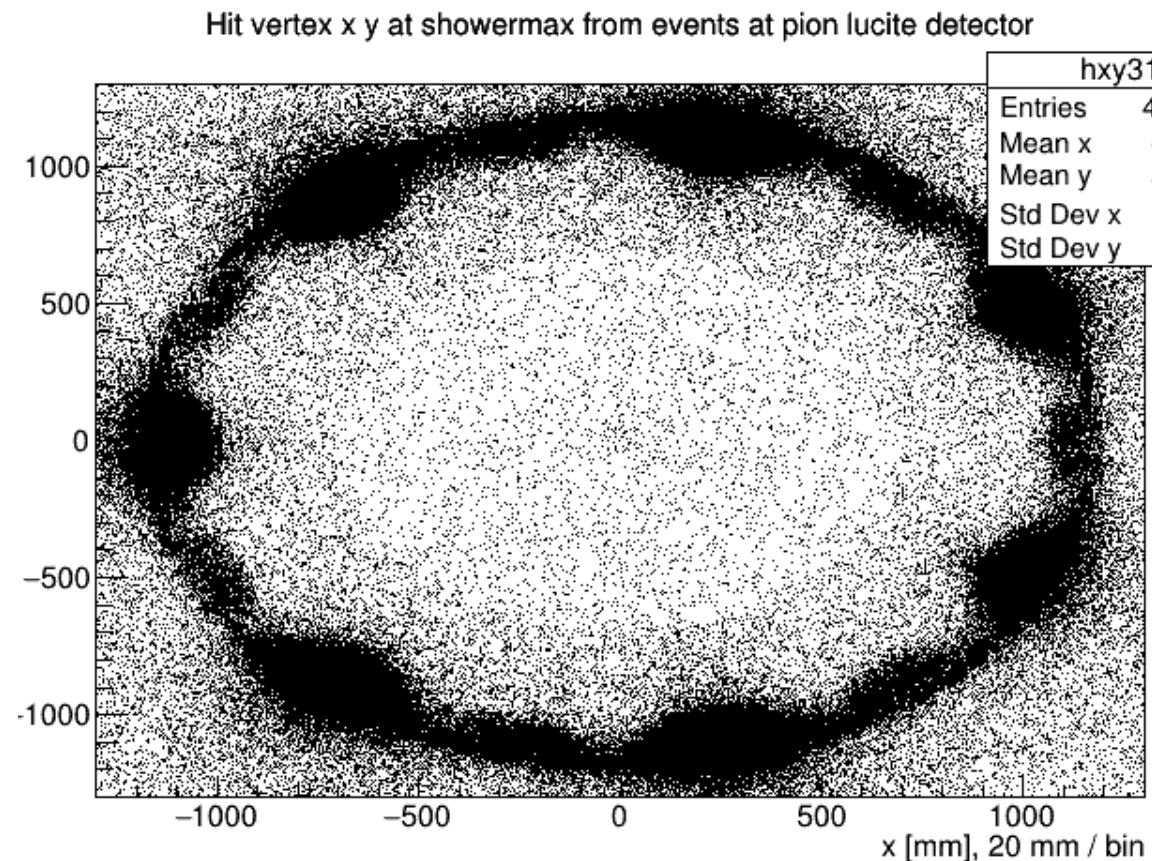

**The location of all the hits on the showermax for 5M events (Galactic frame)
(showermax plane at the center of both showermax detectors)**

```
sqrt(hit.vx**2+hit.vy**2):hit.vz {rate*(hit.det==31 && hit.trid>2)}
```

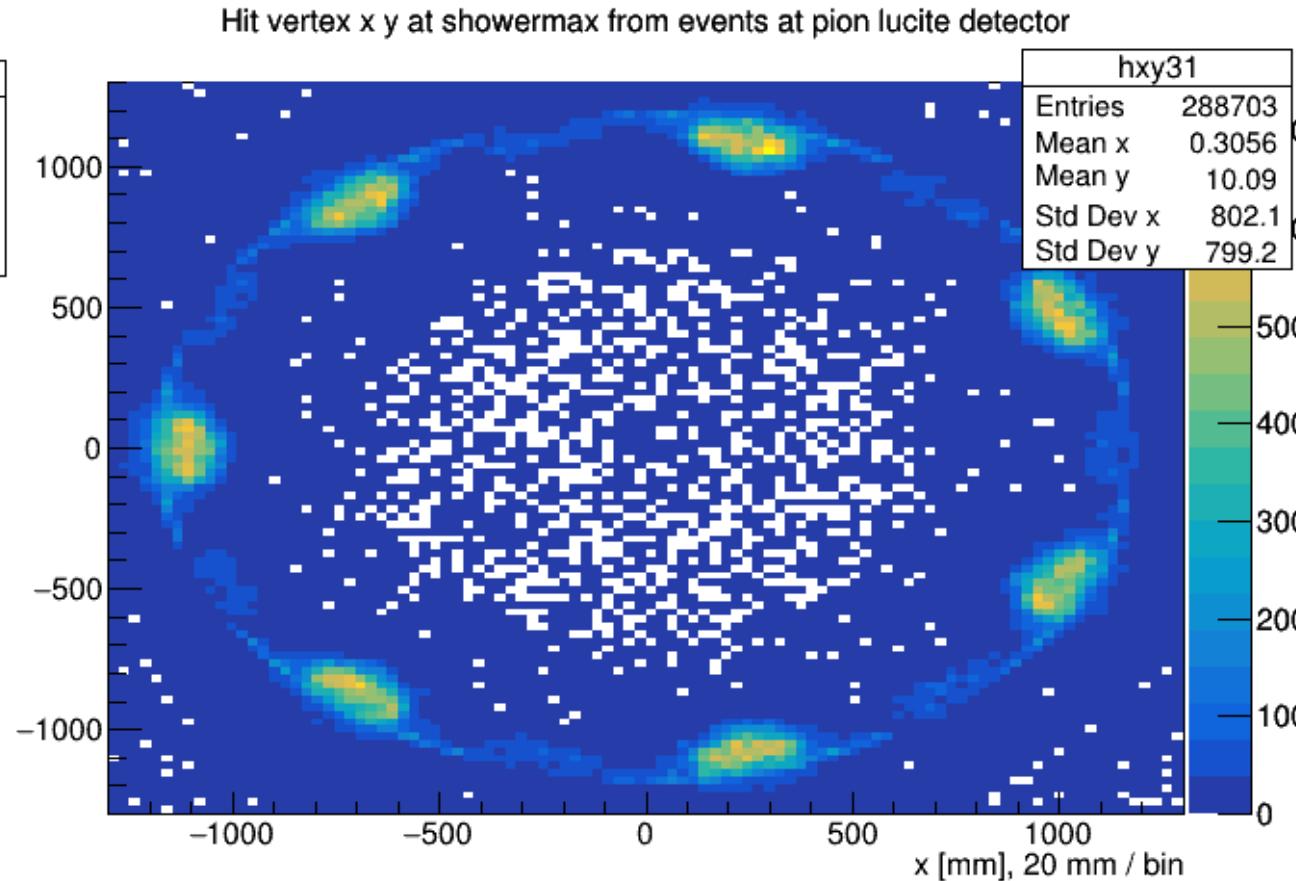

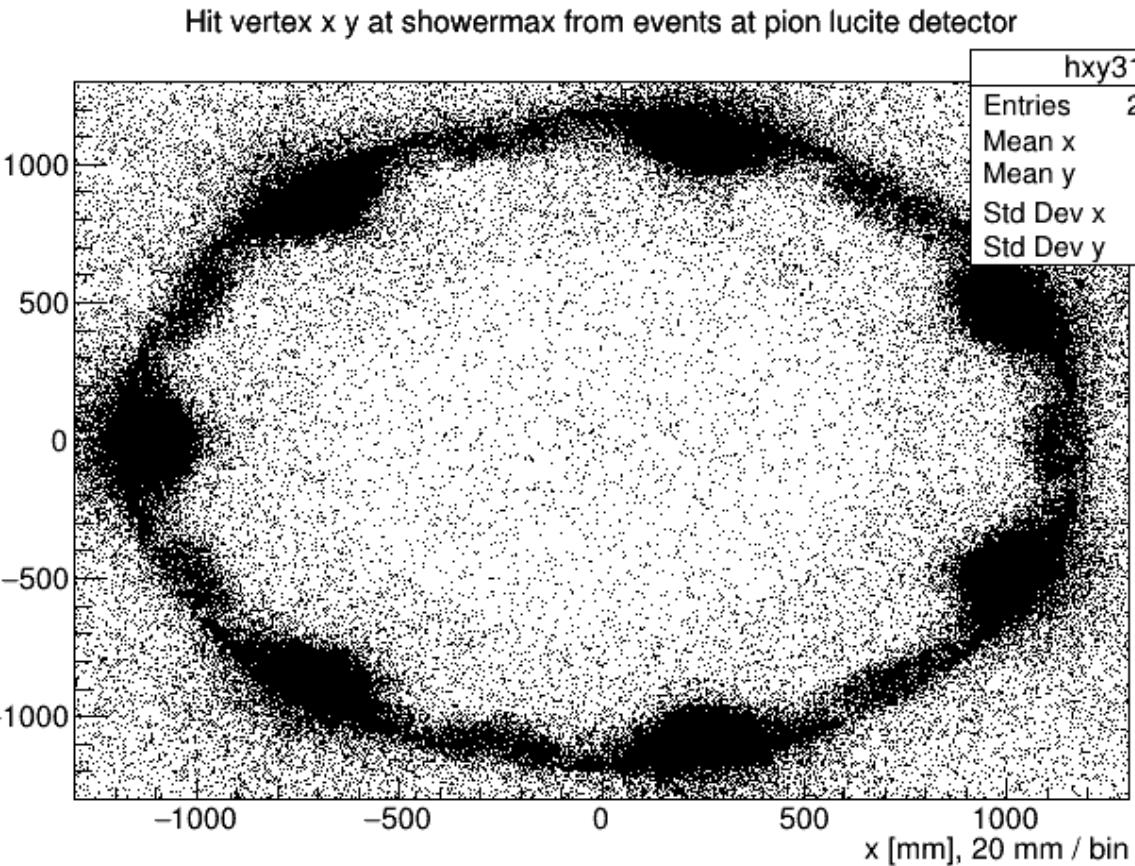

```
T->Draw("sqrt(hit.vx**2+hit.vy**2):hit.vz>>h1(100,23800,26000,100,600,2200)","rate*(hit.det==31 && hit.trid>2)")
```

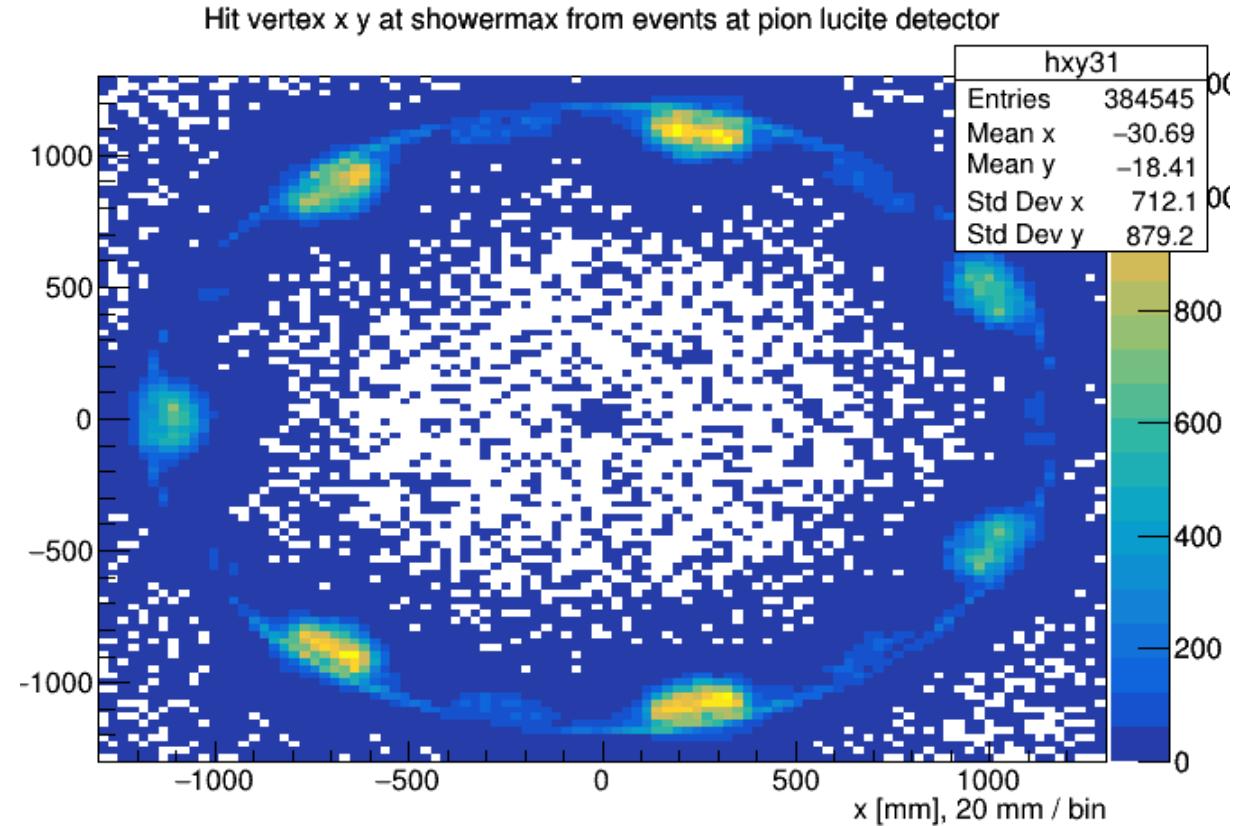

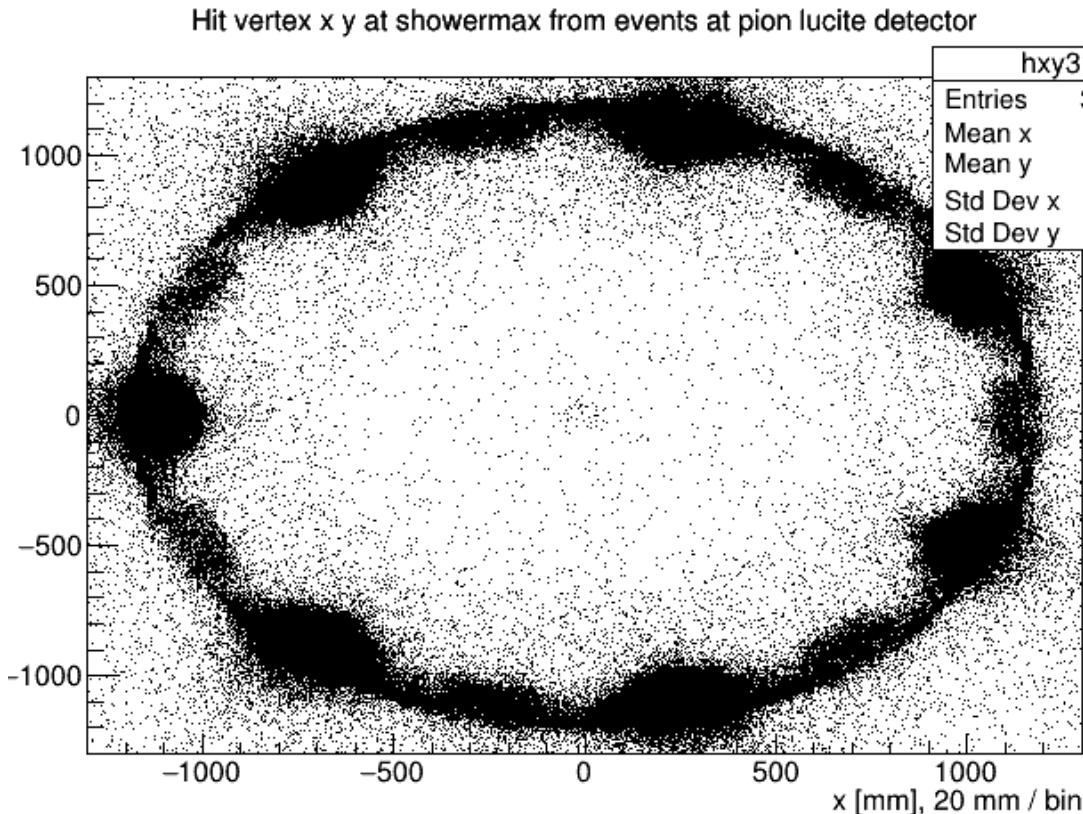

The location of all the hits on the showermax for 5M events in x y - Aluminium frame (Plane at the center)

The location of all the hits on the showermax for 5M events in x y - Galactic frame (Plane at the center)

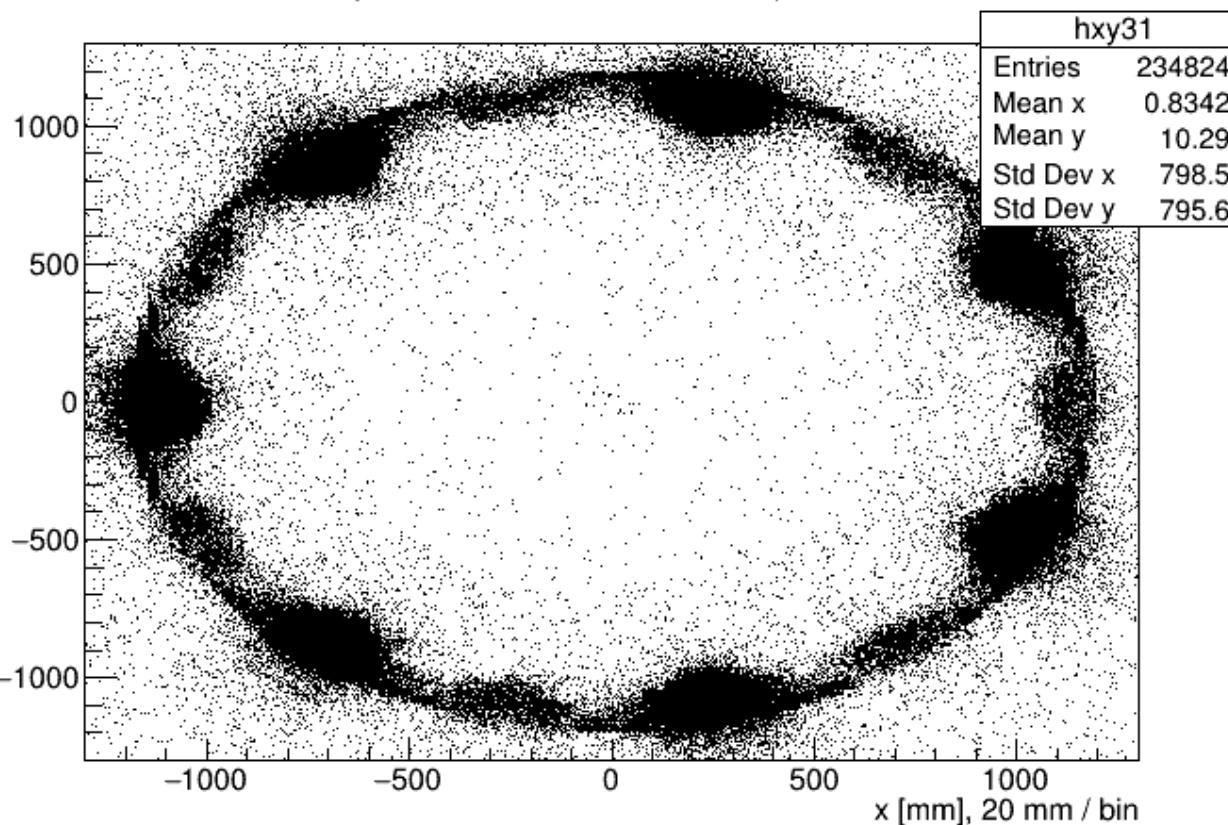

The location of all the hits on the showermax for 5M events in x y - Aluminium frame (Plane at the center-moving forward-hit.pz>0)

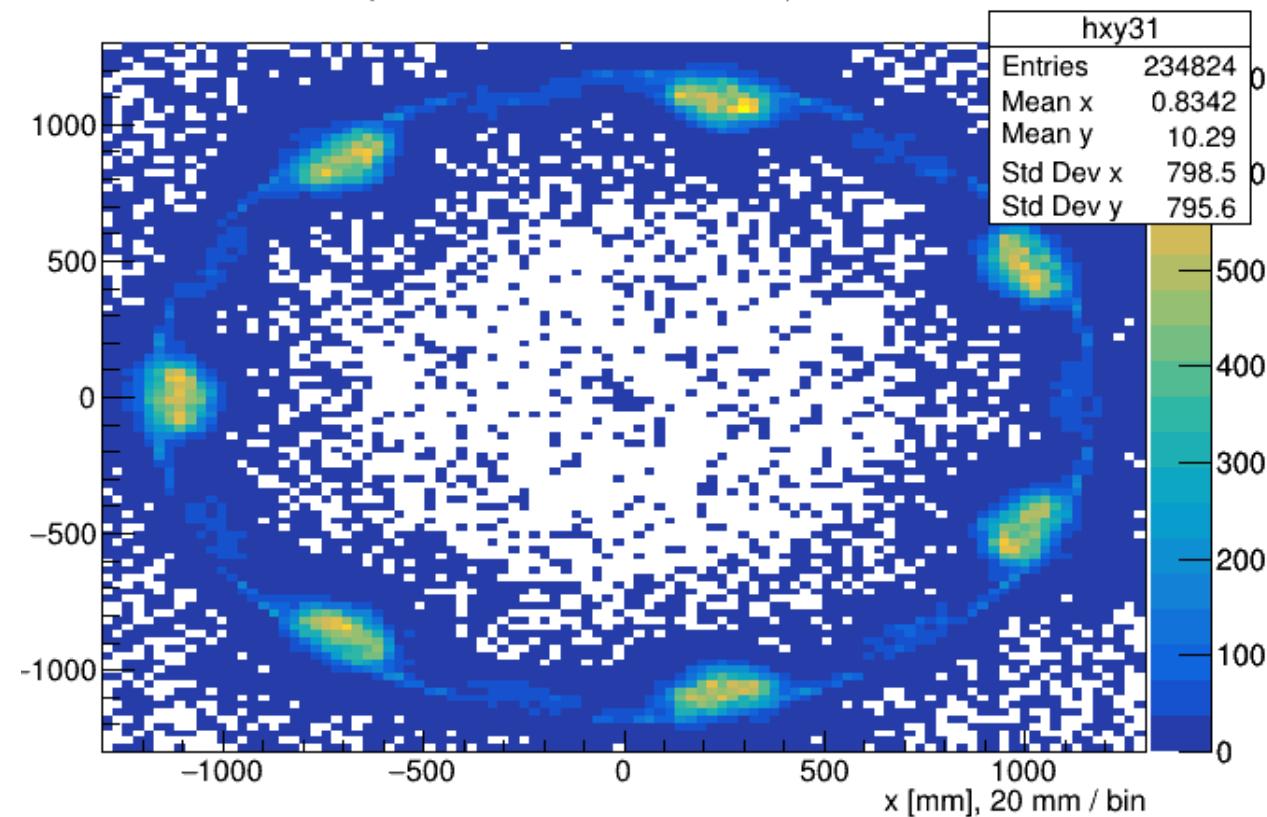

The location of all the hits on the showermax for 5M events in x y - Galactic frame (Plane at the center-moving forward-hit.pz>0)

Hit vertex x y at showermax from events at pion lucite detector

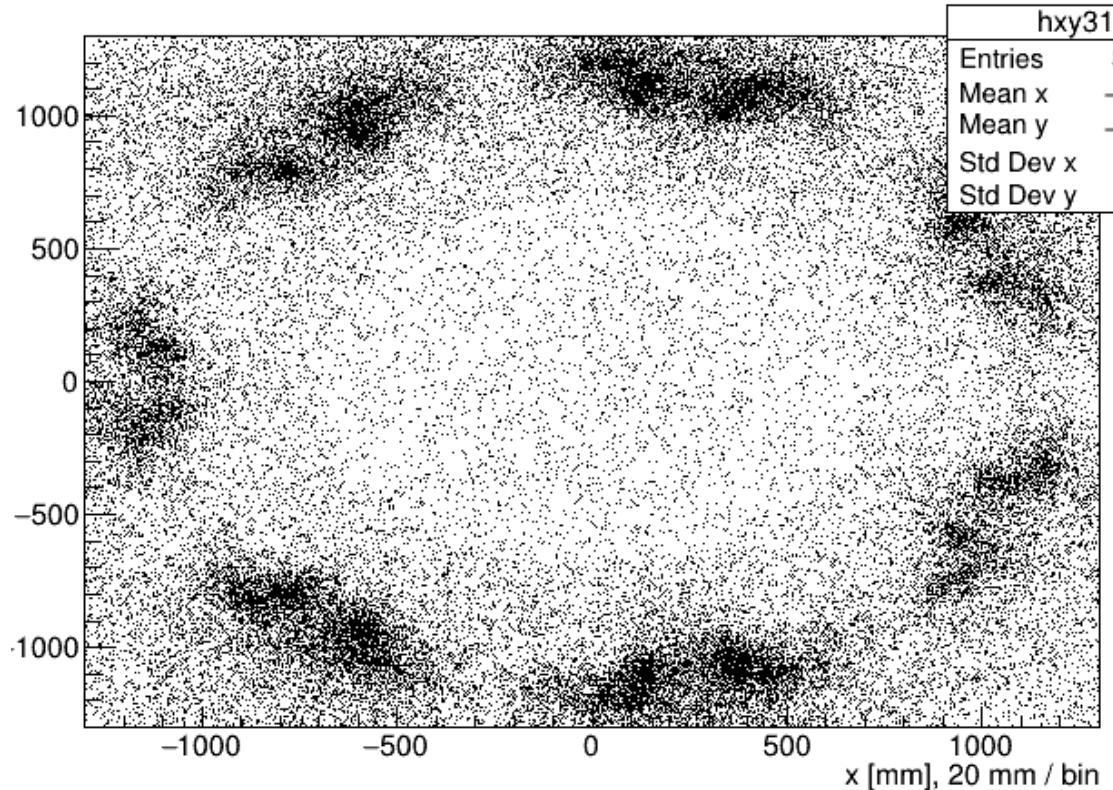

Hit vertex x y at showermax from events at pion lucite detector

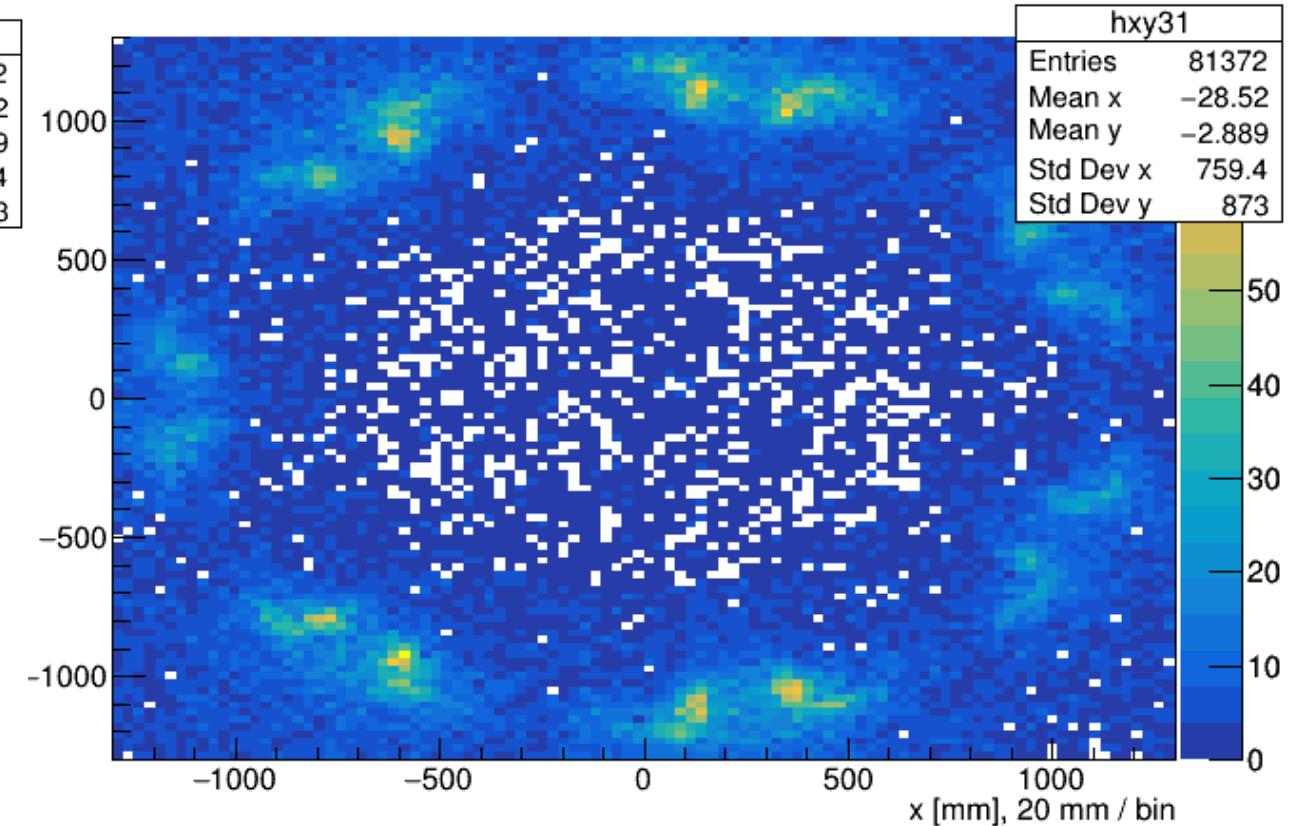

The location of all the hits on the showermax for 5M events in x y - Aluminium frame (Plane at the center-moving backward-hit.pz<0)

Hit vertex x y at showermax from events at pion lucite detector

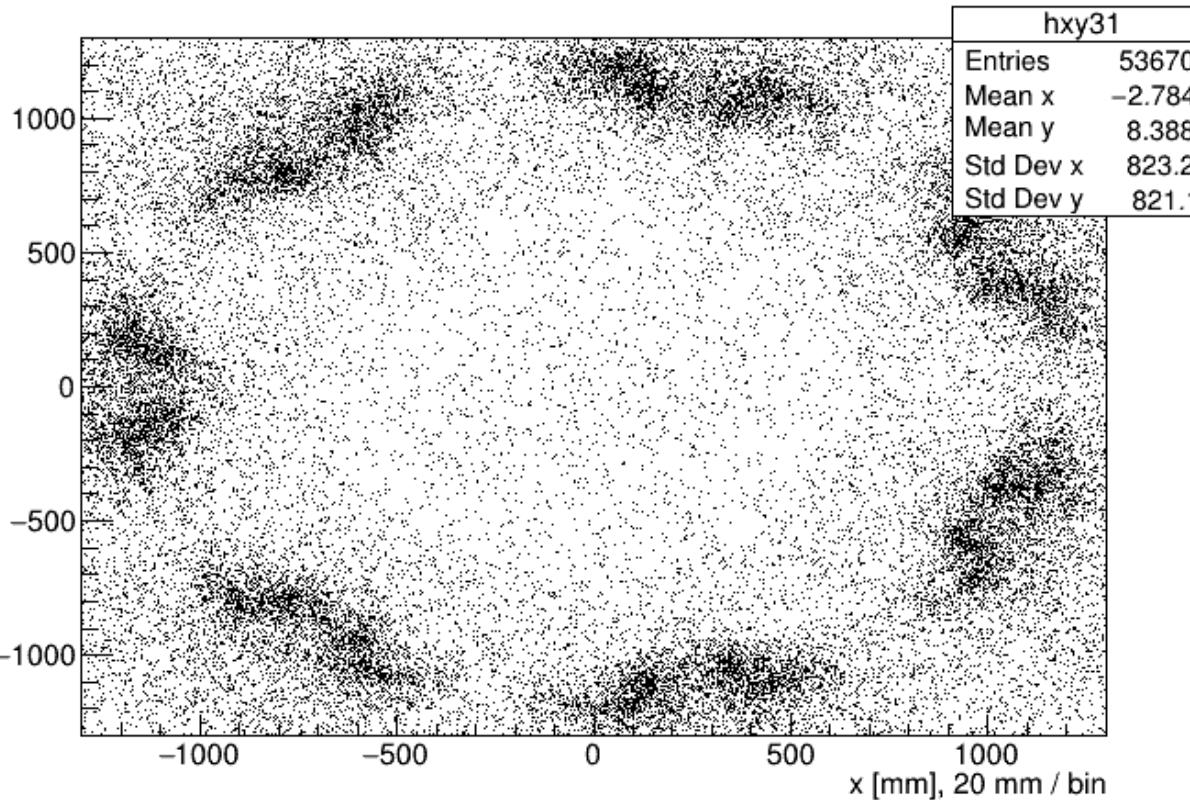

Hit vertex x y at showermax from events at pion lucite detector

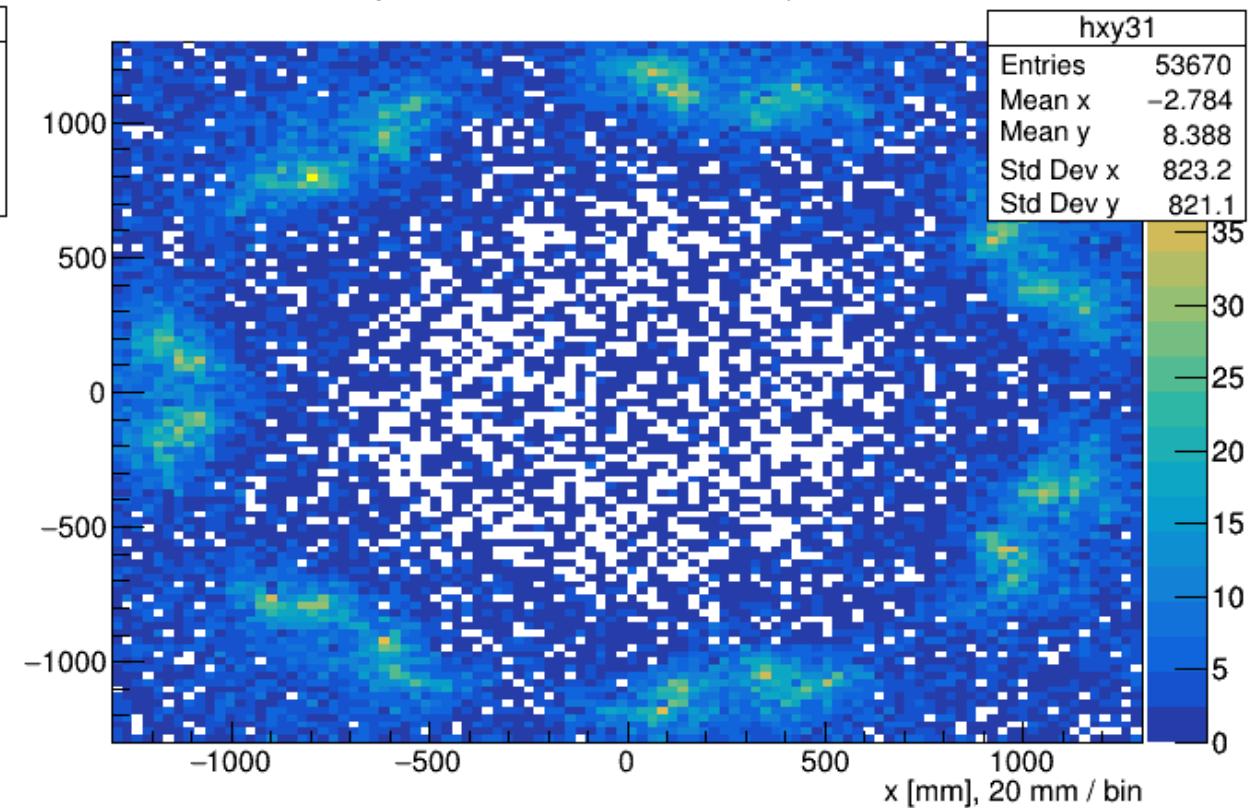

The location of all the hits on the showermax for 5M events in x y - Galactic frame (Plane at the center-moving backward-hit.pz<0)

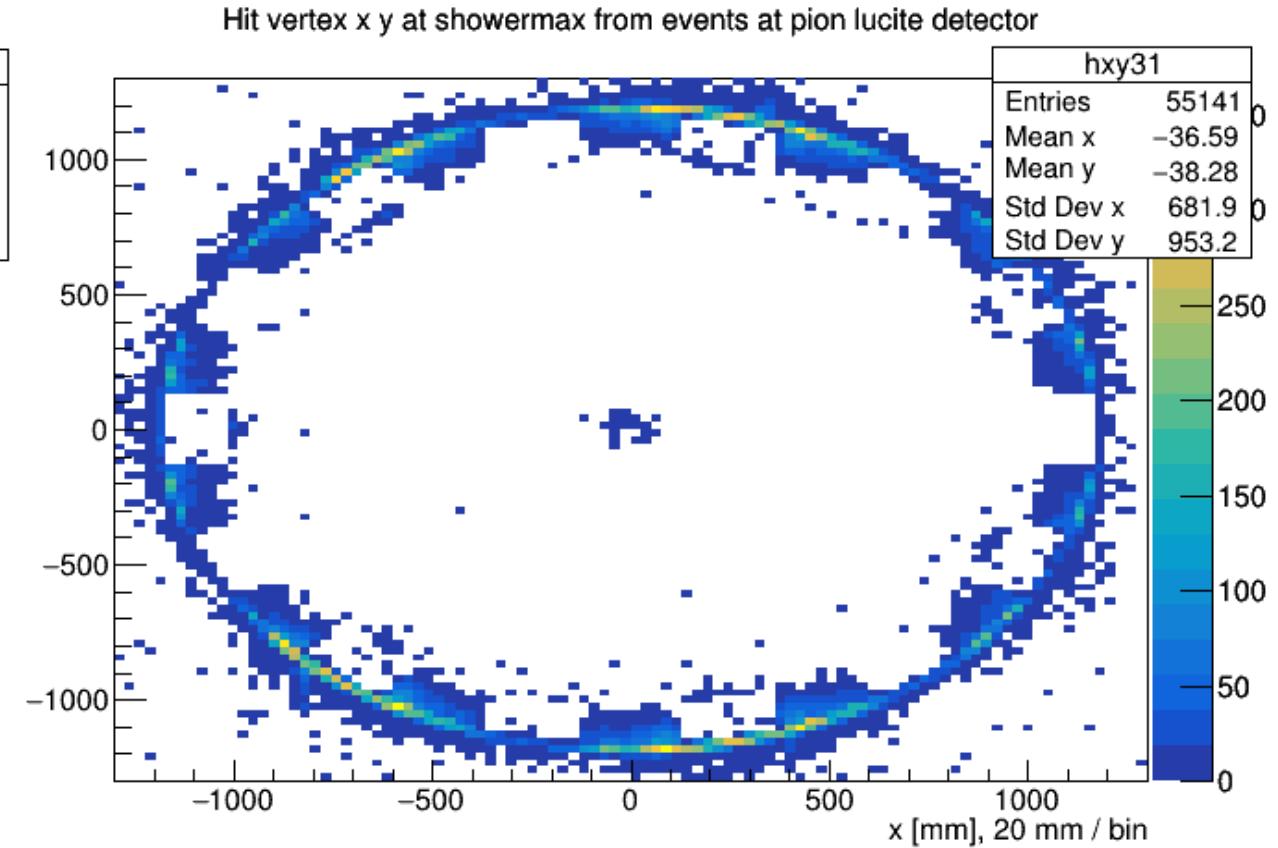

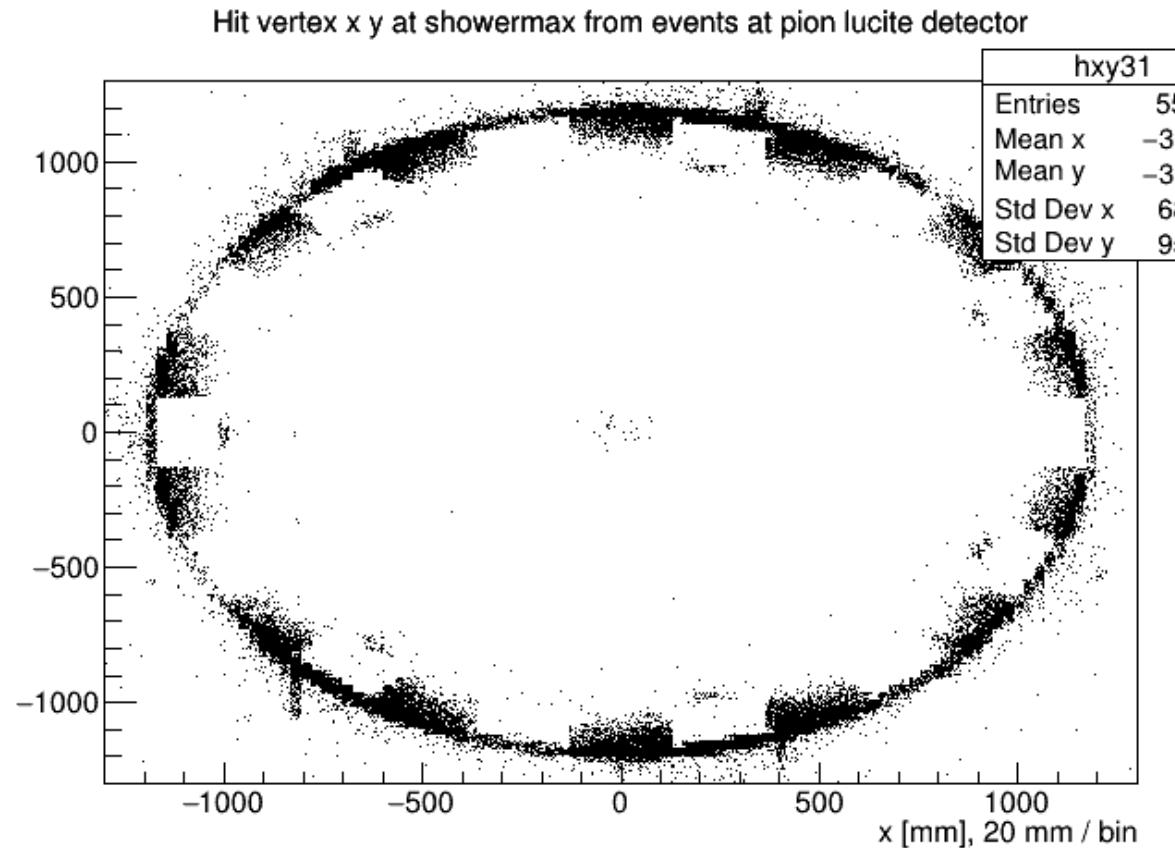

Hit vertex x y at showermax from events at pion lucite detector

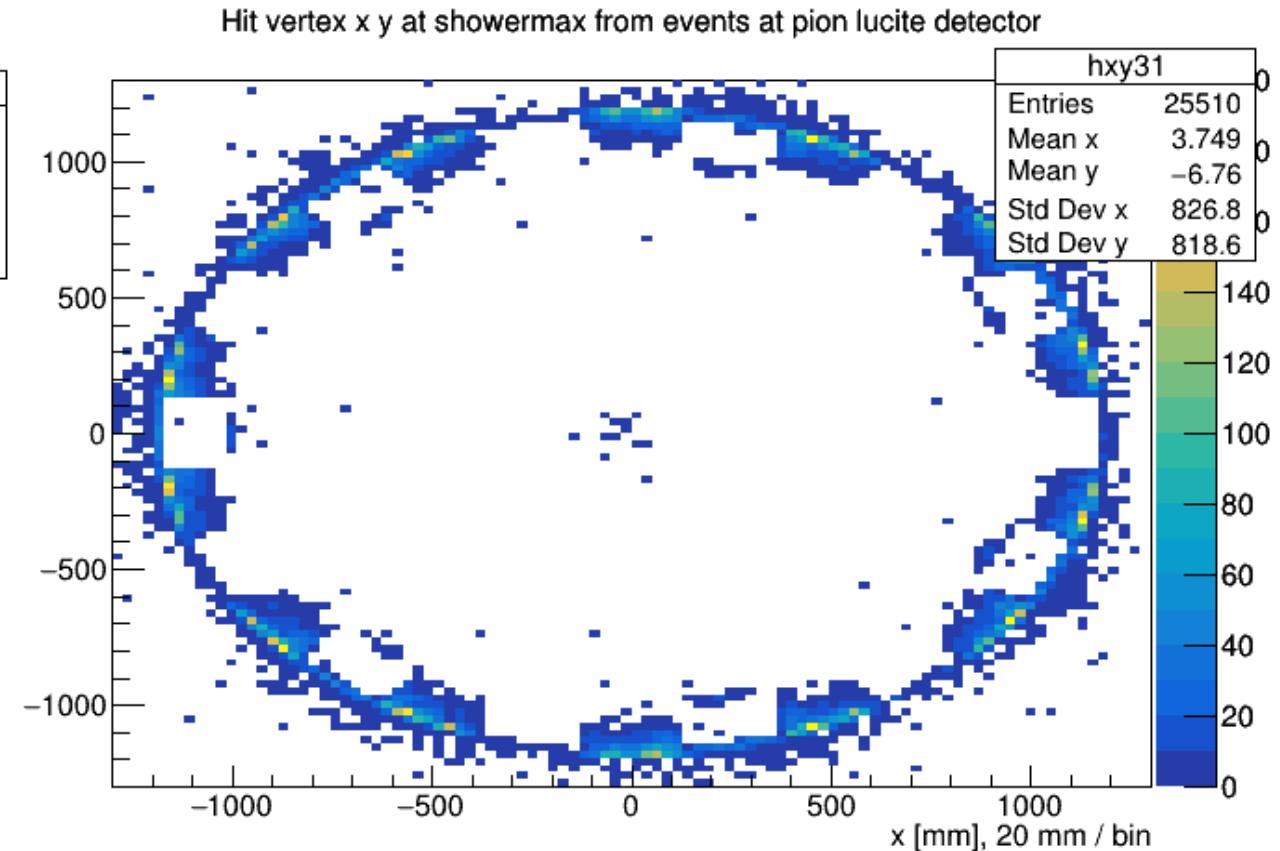

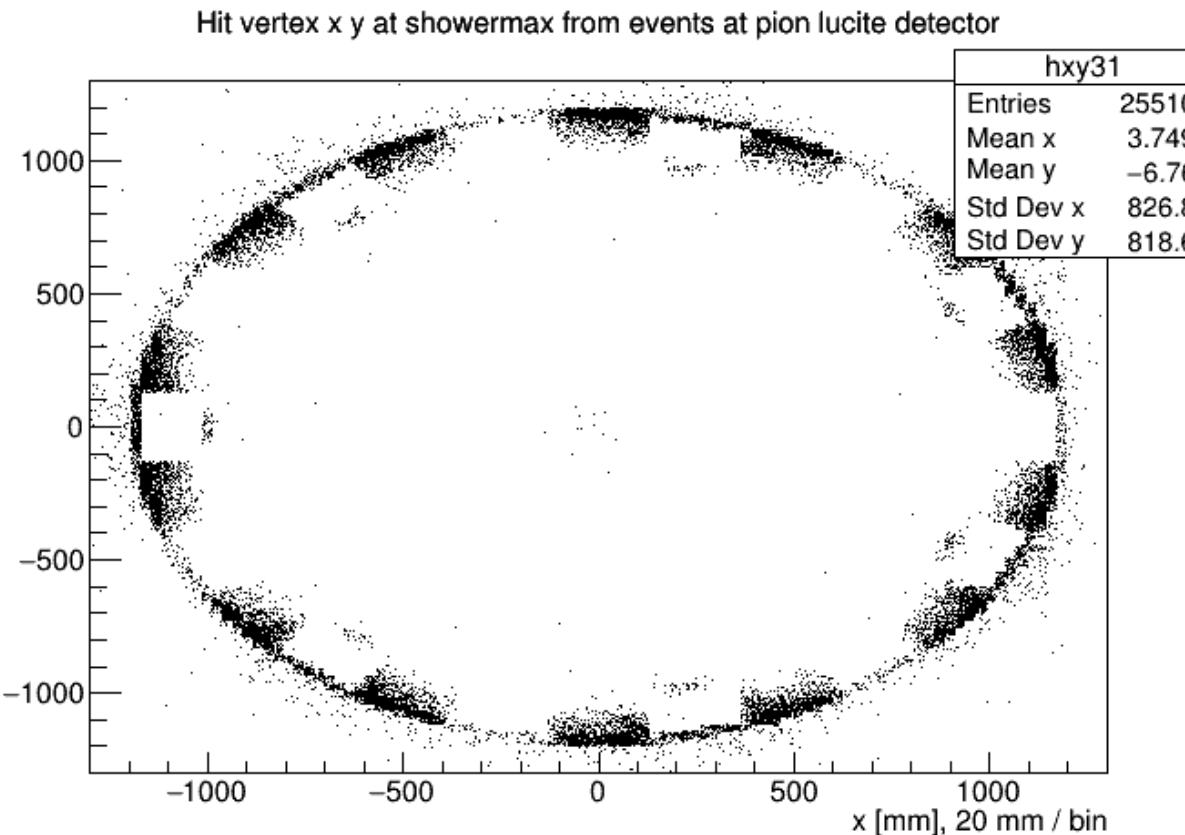

Hit vertex x y at showermax from events at pion lucite detector

The location of all the hits on the showermax for 5M events in x y- Aluminium frame (primaries - plane at the center)

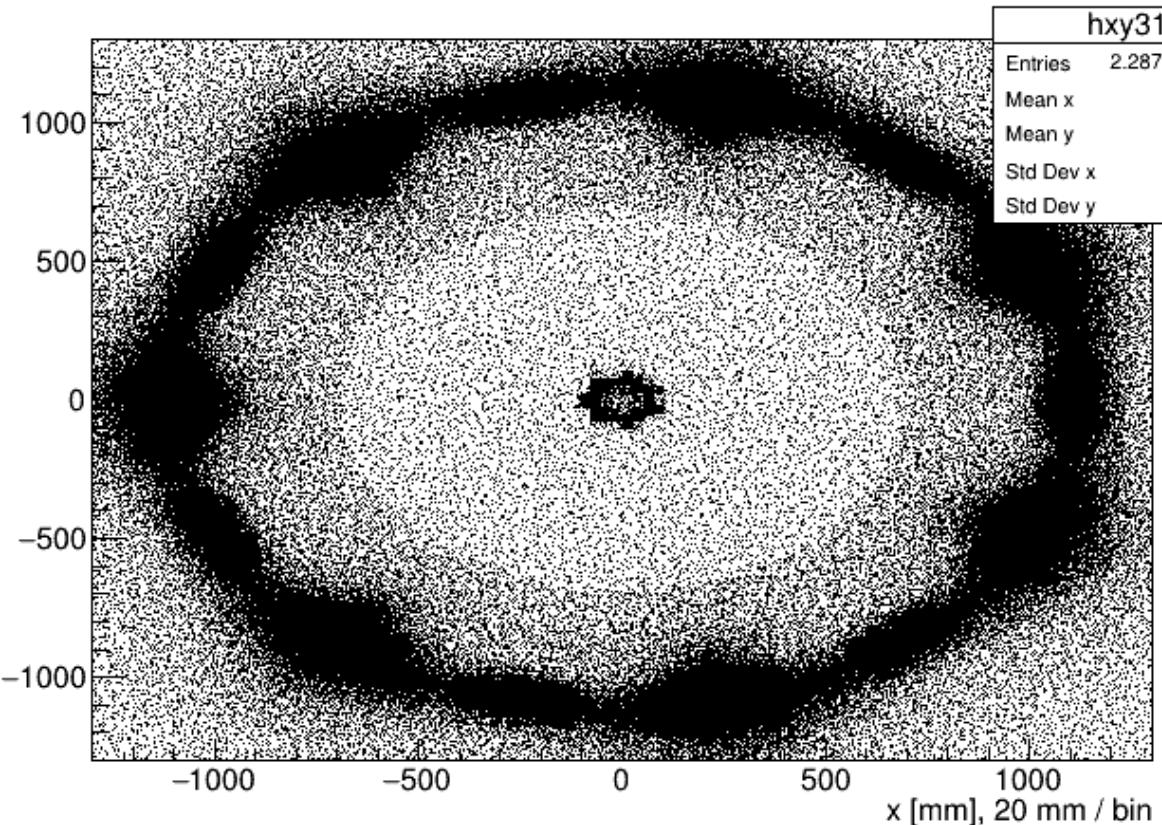

The location of all the hits on the showermax for 5M events in x y – Galactic frame (primaries , plane at the center)

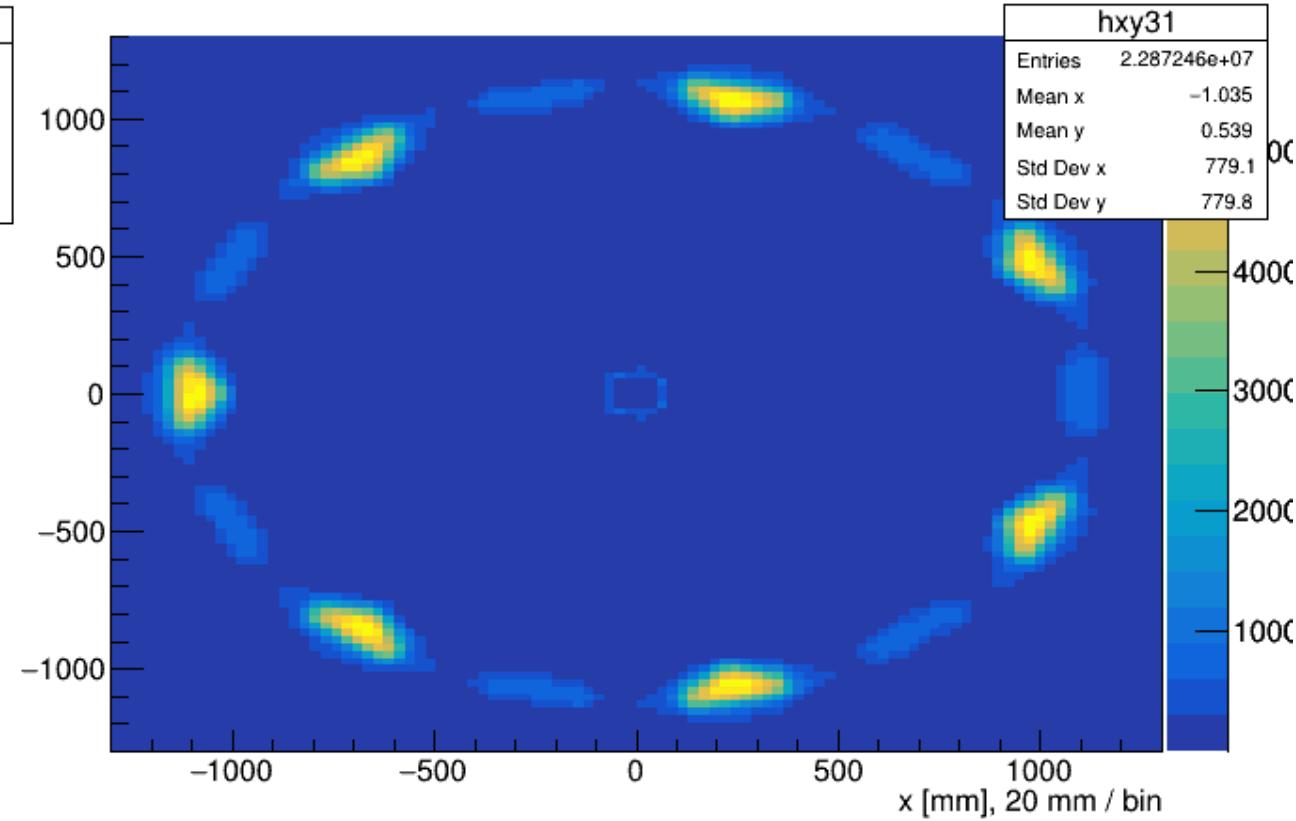

The location of all the hits on the showermax for 5M events in x y - Aluminium frame (without the Lucite, plane at the center)

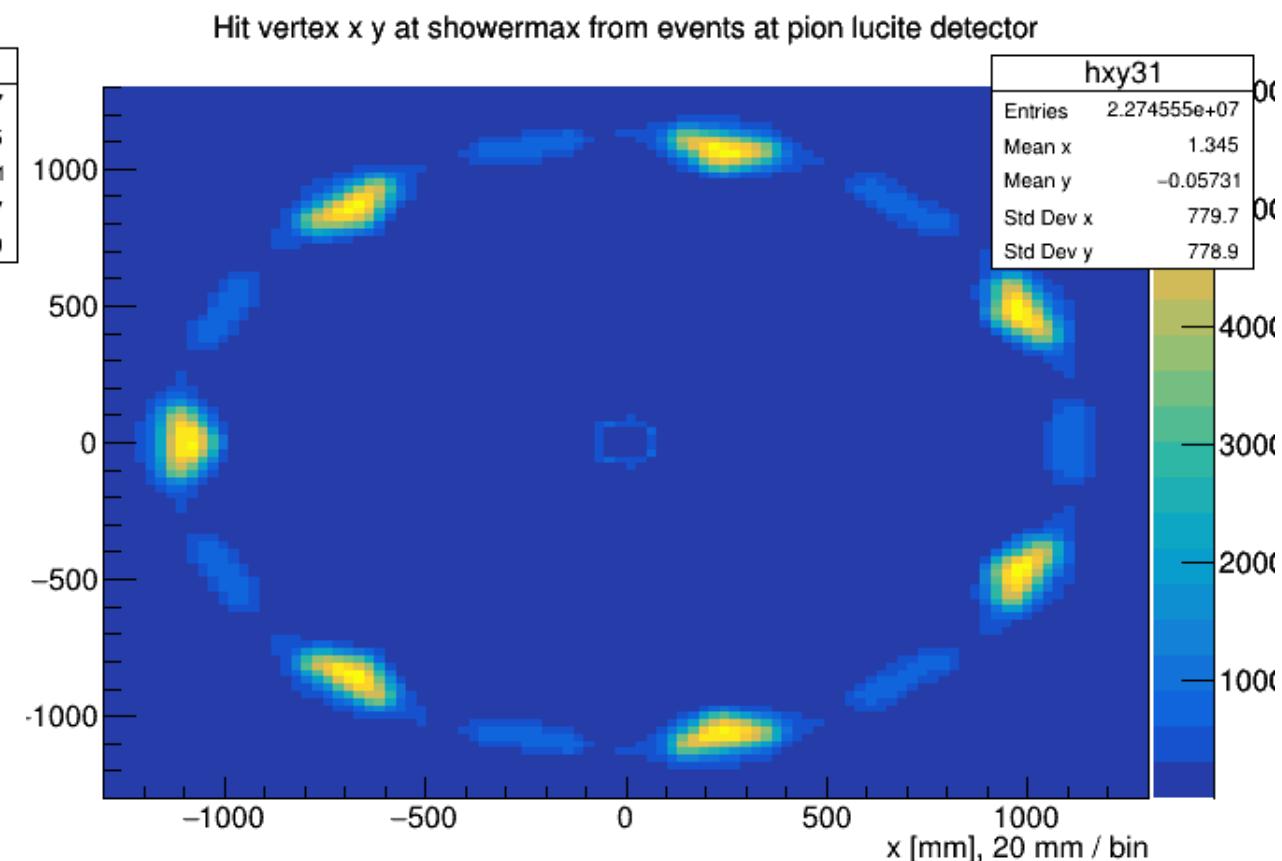

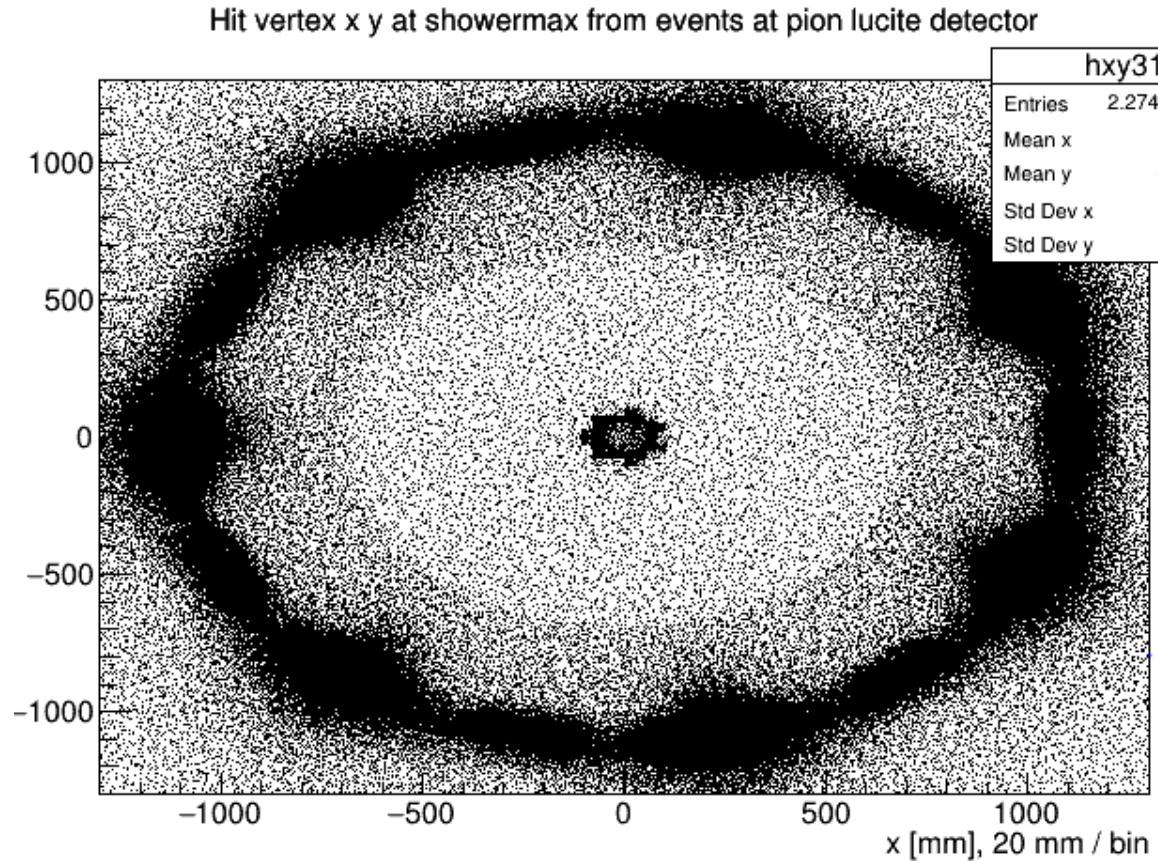

Hit vertex x y at showermax from events at pion lucite detector

Hit vertex x y at showermax from events at pion lucite detector

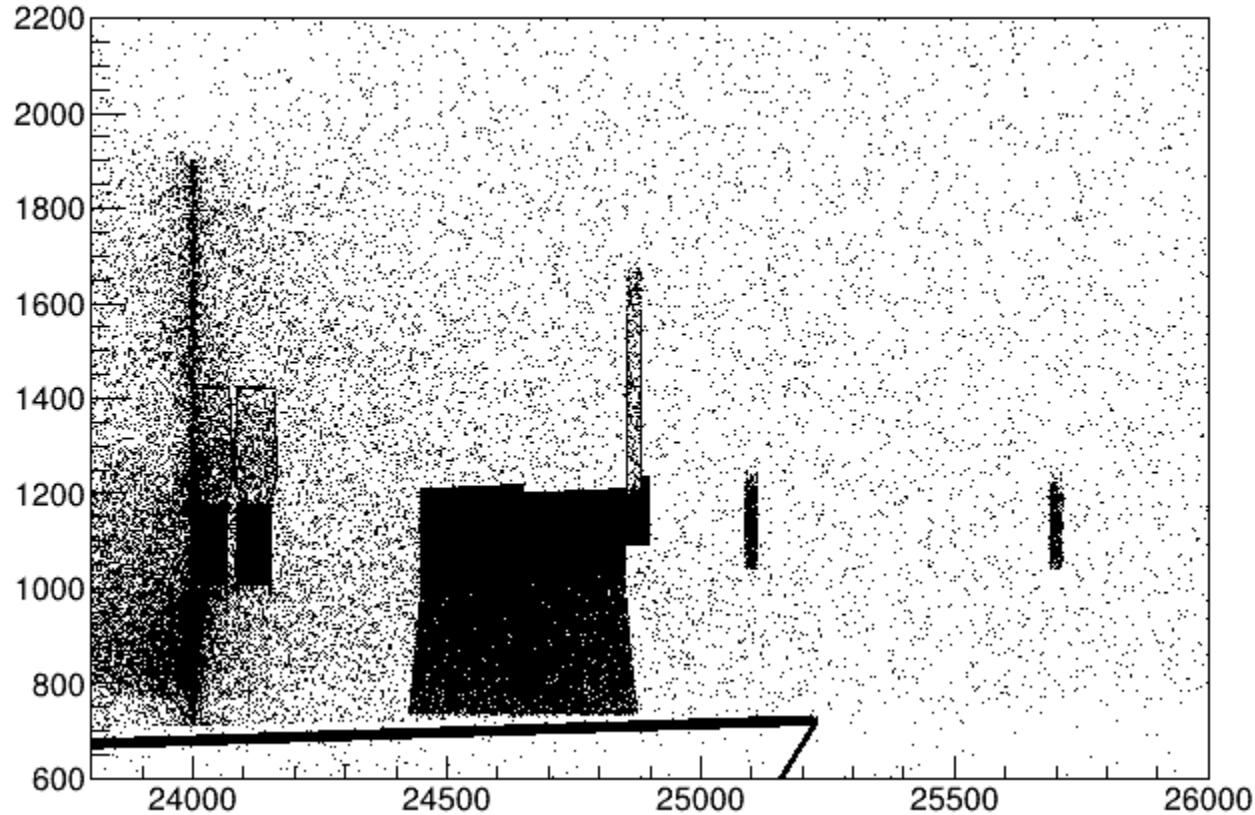

The location of all the hits on the showermax for 5M events in x y - Galactic frame (without the Lucite, plane at the center)

**The location of all the hits on the showermax for 5M events (Galactic frame)
(showermax plane at the upstream of both showermax detectors)**

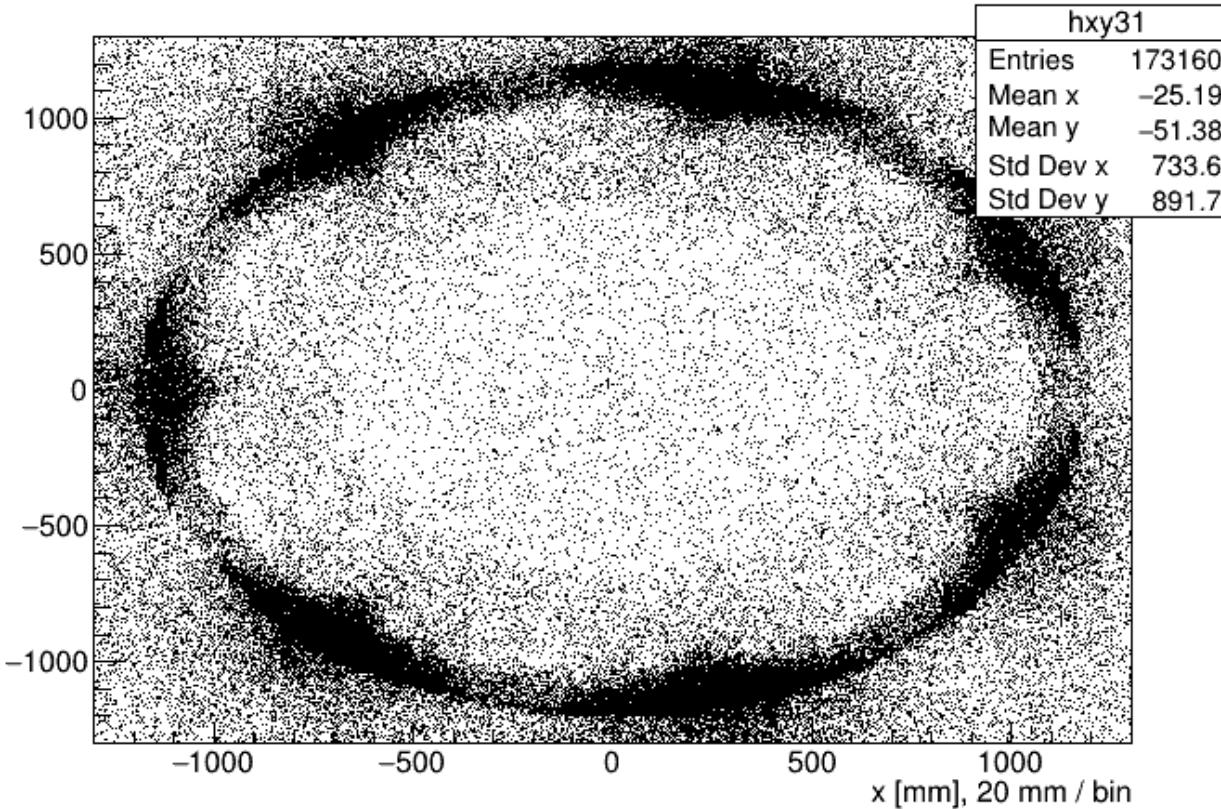

`sqrt(hit.vx**2+hit.vy**2):hit.vz {rate*(hit.det==31 && hit.trid>2)}`

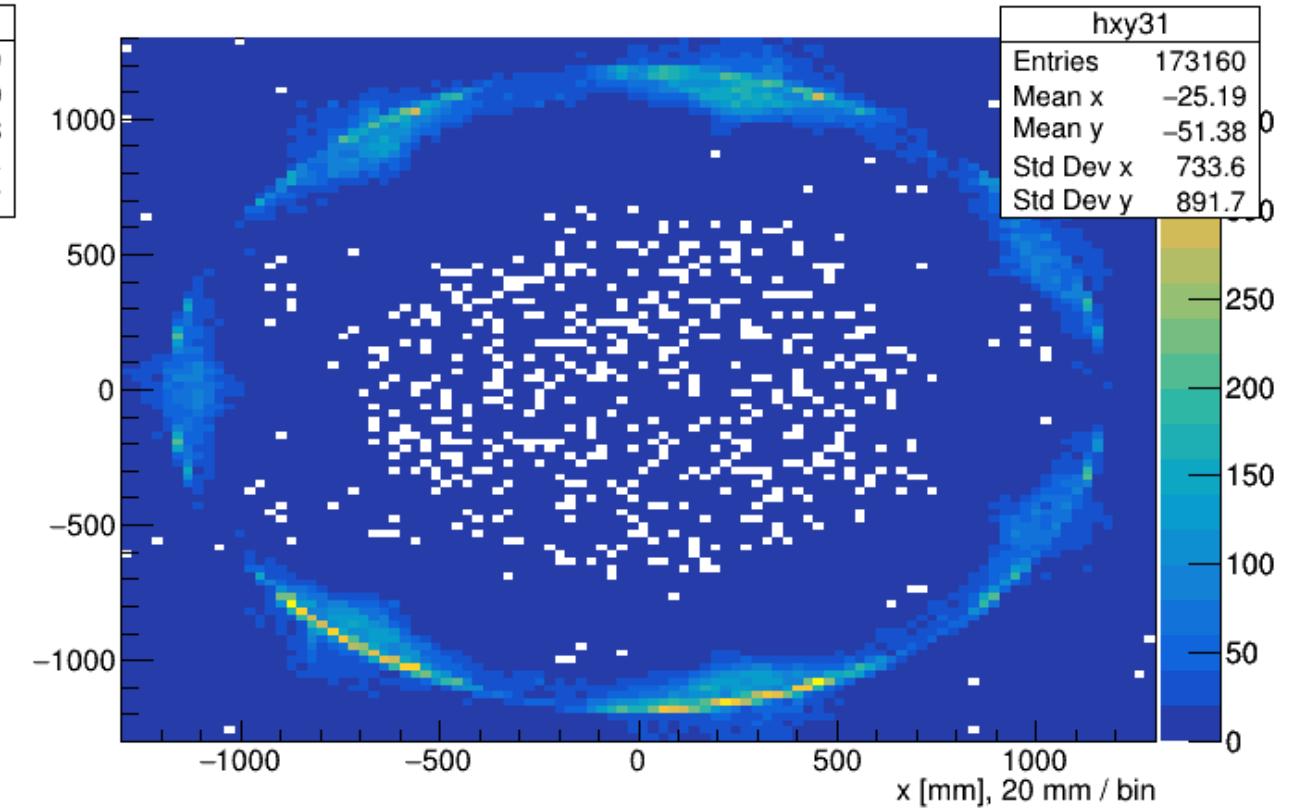

`T->Draw("sqrt(hit.vx**2+hit.vy**2):hit.vz>>h1(100,23800,26000,100,600,2200)","rate*(hit.det==31 && hit.trid>2)")`

The location of all the hits on the showermax for 5M events in x y - Aluminium frame (Plane at the upstream)
